Boot Size Guide

How to measure your foot

1. Measure in the afternoon, when feet are largest.
2. Stand on a sheet of paper wearing hiking socks and mark the tip of your longest toe and your heel.
3. Measure the distance in centimetres and choose the size whose foot length is the same or slightly longer.

If you are between two sizes, choose the larger one: you need about 1 cm of space in front of your toes for downhill walking.

Size chart (Northwind boots)

EU	UK	US men	US women	Foot length
37	4	5	6	23.5 cm
38	5	6	7	24.0 cm
39	6	7	8	24.8 cm
40	6.5	7.5	8.5	25.4 cm
41	7.5	8.5	9.5	26.0 cm
42	8	9	10	26.7 cm
43	9	10	11	27.5 cm
44	9.5	10.5	11.5	28.0 cm
45	10.5	11.5	12.5	28.8 cm
46	11	12	13	29.4 cm

Our Summit boots run true to size. The Scree trail shoes are narrow: people with wide feet should take half a size more.
